On the shallow-plowed section, the taller and less yellow, while on the subseven inches deep.

Now, it will not do for farmers to calculate that deeply stirring every kind of soils would alone add tifty per cent. to the yield of crops grown upon them the following two years, for they would doubtless be disappointed in very many cases. Yet, as a rule, a

farmer the better results. There are soils which naturally are never too wet, and rarely too dry, and it will usually be found on examination that they are in the same mechanical condition for a considerable depth, say two feet or more, that one likes to have his surface soil, light, friable and containing a due proportion of vegetable matter. They will also be found to contain sand and clay in about the right proportion to keep the soil both mellow and moist through the varying climatic conditions. Deep plowing of stiff clays is often dangerous at first, but a good, dry soil suits all kinds of crops in all kinds of weather. Deep paralysis, varying in extent with the plowing tends to make such a soil, but this alone will not always be sufficient. Draining and manuring must accompany deep plowing .-- N. E. Farmer.

## What Paralysis Is.

So common has become the occurence of paralysis in recent years that many use the word for a slang expres-sion; but for all that, it is probable that a vast majority of the people who think at all of paralysis reckon that it is a dis-ease of itself. That some medical men so regard this condition is plain from the fact that deaths are frequently certified to have been caused by it. The incorrectness of this notion will, however, be plain when the conditions which give rise to paralysis are clearly set

forth. and this we now propose. A carpenter, blacksmith, or some mechanic whose business requires him to that he is unable to raise his hammerarm; or perhaps while at work the man number of large hot-houses for growing suddenly feels his arm become numb early cucumbers, keeps a hive of bees in and weak, it falls to his side, and he is each house for the purpose of distribut | no longer able to work. The doctor to whom the man applies says: "A brachial monoplegia from muscle tire," which means simply that the man has overwrought his hammer-arm, and it needs rest. To these cases the very ap- the blood, and is the best remedy for conpropriate name of "artisans' palsy" is given. Again, a poor-blooded, nervously-constructed person, most likely a woman, meets with a great shock, or Indiana State Board of Agriculture, has has to endure an unusual and prolonged mental or physical effort. Soon, and perhaps without warning, the indistem is now as thick as one's wrist and vidual loses the use of some part of the body, often of the vocal apparatus, and the patient is unable to speak above a whisper. The doctor says "hysterical paralysis," or "hysterical aphonia," loss of voice. Now just how this comes enough milk to make it smooth. But about we fancy it would puzzle the ter the saucepan, and put in the re- most learned doctor to say. By some event which determines an unusual quantity of blood in the brain one of these now elastic tubes is broken, the poured-out blood clots, as before mentioned, and a

paralysis immediately follows. Owing to certain systemic conditions fibrin, a substance normally suspended in the blood, lodges upon the flooddeep, mellow soil from which surplus gates-valves-of the heart. Presently water can readily settle without making the land into mortar, and through and washed away into the blood; which the same moisture can again perchance it reaches an artery in freely rise by capillary attraction, other things being equal, will always bring a to pass. This at once cuts off the blood supply from a part of the brain, one of the immediate symptoms of which is palsy of the part of the body which receives its nervous supply from that portion of the brain. These paralyses are usually extensive and are not readily distinguishable from those

just mentioned. The presence of worms in the bowels COTTON-Middling..... of children is belived to cause paralysis TOBACCO-New Lugs...... 4 40 @ 4 75 in some cases. Such cases being due Medium new leaf 6 25 @ 5 75 in some cases. Such cases being due to a known removable cause are described as reflex paralyses. These are not seen alone in children, but in adults as well. Finally, change in the structare of the brain or spinal cord produce extent of nerve structure involved. Such paralyses are especially obstinate in those of advanced years. Change of structure in the spinal cord usually produces disability of the legs. Now, these are the most common causes of paralysis, and, from what has been said, it will be observed that paralysis is not a disease of itself. Neither is it always incurable.—N. Y. NEW YORK. 

FORTY BILLION GERMS.

A Wonderful Theory That Concerns the Welfare, Happiness and Life of Everyone.

In his quiet and cozy library at the close of a busy day sat a gentleman and his wife, he absorbed in a new book and she in the newspaper. Quickly glancing toward her husband, she asked, at a certain point in the article:

"John, what is the germ theory?" "The germ theory-well-yes; just look

in the encyclopedia under 'Germ,' that will

explain it so much better than I can."

Accordingly his wife opened the book at the word named and read: Germ Theory of Disease-A theory advanced by the ablest and best investigators and scientists of the times. It supposes the surface of the earth, the air and water to be inhabited to a greater or less extent with a peculiar growth of the lowest form of fungi-commonly termed bacteria, whose power of reproduction, under favorable conditions, is so great that a single germ will increase to fifteen million in twenty-four hours' time, days' time, if space and food be furnished. There is no condition under which it can be said to be absent, unless it be from fire or air filtered through cotton-batting in numerous layers. A single drop of water filtered and thus freed from bacteria, will grow murky in a day or two from the development of new germs. When it is considered that it requires about forty billion to weigh one grain, some remote idea can be had of the capacity of germ reproduc-tion. Prof. John Tyndall, in a late work, elaborately treats of the influence of germs in the propagation of disease, and charges upon this cause the inception and development of very many of the ailments most injurious to man. Prof. Pasteur, an eminent French savant, has carried his original and beautiful experiments so far, and from them deduced such practical results, as very greatly to diminish the number of cases of anthrax among sheep and chicken cholera among fowls-proving his theory that these are essentially and actually germ diseases. These germs are carried into the system through the lungs, the stomach and possibly the skin, but through the lungs chiefly. Once in the system, they begin to develop, poisoning the blood, invading the nerve centers, disturbing the functional activity of the great organs of the body, and inducing a general impairment of the vital processes. They are the cause of fevers, rheumatism, Bright's disease of the kidneys, pneumonia, blood poisoning, liver disease, diphtheria and many other ailments. Lately Prof. Koch, a famous German physician, has proved that consump-tion of the lungs is due to this cause—the presence of a peculiar germ.

When the circulation is bounding, the nerves elastic and the system all aglow with life and energy, the germs seem to de-velop poorly, if at all. But with weakened nerves, poor digestion or malassimilation of food or a lowering of vitality from any cause, a change ensues, and in this impoverished and weakened fluid the germ finds a genial home and develops until symptoms of disease are distinctly manifested. those whose systems have become weak | will be sufficient. contract colds from any cause readily This is on the same principle as the germ theory. The germs attack any weakened spot in the body, and fixing themselves upon it, begin their propagation. It is plain therefore that it is only by fortifying the weak portions of the body that the germs of disease can be resisted and driven from the system. But this has proved almost an impossibility heretofore, and it has been the study of physicians for years A GOOD many of the young bloods wear how best to accomplish it. Within the past diamond study that stick. Paste always few years, however, a preparation has been attracting great attention, not only throughout the entire land, but among the medical profession and scientists generally, which is based upon this theory, and it may safely be said, no remedy has ever been found which can so successfully place the system in a condition to resist the germs of disease as Warner's Sale Cure. This article is unquestionably the best and most efficient that has ever been discovered

for this purpose, and—
"John, say, John! does the encyclopedia
advertise Warner's Safe Cure?" "I should not wonder, dear, it's a grand remedy, and that pamphlet we received the other day stated that Dr. Gunn, of the United States Medical College indorsed it. At all events the wonderful cures it is accomplishing entitle it to be honorably noted among the great discoveries of the present century."

However the facts above stated may be, the truth remains that the germ theory of disease is the correct one, and that the great remedy mentioned is the only one which has ever been found that can put the system in a condition to kill these germs before they obtain a hold upon the body, and undermine the life.

CONSUMPTION.

This most remarkable statement was made by Mr. Frank B. Lee, clerk in the office of N. Y. C. & H. R. R. R., Little Falls, N. Y., on the 8th of June, 1883. Mr. Lee says: "My father has been troubled for overtwenty years with severe kidney and bladder disease, suffering the most scute pain when urinating. He became so bad that he was obliged to give up all business. His condition was such that his urine would drop constantly, and he was obliged to use a rubber bag, the weakness was so great. He used many kinds of medicine without deriving any benefit, until he was urged by one of our druggists in Little Falls (Mr. Skinner) to use Hunt's Remedy, as he had known of its being used in many cases with great success. I purchased one bottle, and he commenced using it, and he was so improved that he got along without the rubber bag. He used in all twelve bottles, and it has entirely cured him. Father is sixty-two years old, and we consider it a most wonderful cure, and cheerfully recommend Hunt's Remedy to all afflicted with kidney, liver or urinary troubles." All the evidence published in regard to Hunt's Reme

dy can be relied upon; it is true in every particular.

# DR. JOHN BULL'S

**FEVER and ACUE** 

Or CHILLS and FEVER, AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken produces results very like those which | Swift's Specific (S. S. S.) after trying ev- all. WOMAN AND THE BABY.

What a puzzle the little child is in the domestic economy! How the mother gives of her own life and strength to support the life her blessed little youngster! How the child kicks, and laughs, and crows!

How the child grows, and is heavier and heavier every day.

And yet she lifts him, and tosses him, and plays with him, and takes care of him by day and by night.

Is it any wonder the mother breaks down? Her back aches. Her stomach fails her. Her liver is bad. Her blood is thin, and she says she feels poorly. Yes, yes, poorly—very poorly. Give mother a bottle of Brown's Iron Bitters. She needs the iron in her blood, which that will put there. She must have strength, or she will be a confirmed old invalid. Brown's Iron Bitters helps worn and weary women into new life,

cheerfulness, and vigor. Tell all the mothers you know. CROUP, ASTHMA, BRONCHITIS, Neuralgia, Rheumatism. JOHNSON'S ANODYNE LINIMENT

## (for Internal and External Use) will in-stantly relieve these terrible diseases, and will positively cure nine cases out of ten. Information that will save many lives sent information that will save many lives sent information that will save many lives sent in its better than cure. JOHNSON & CO., Boston, Mass.

## Lay the Axe to the Root

If you would destroy the cankering worm. For any external pain, sore, wound or lameness of man or beast, use only MEXICAN MUSTANG LINI-MENT. It penetrates all muscle and flesh to the very bone, expelling all inflammation, soreness and pain, and healing the diseased part as no other Liniment ever did or can. So saith the experience of two generations of sufferers, and so will you say when you have tried the "Mustang."

Anakesis" gives instant relief, and is an infullible cure for Piles. Price \$1, from druggists, or sent prepaid by mail. Samples free. Ad. "ANAKESIS," Makers, Box 2416, New York.
